Artist Statement:

I come from a small farming community in west central Iowa (Coon Rapids). I love making things. I want my sculptures to be personable and relatable. I want my work to be visually intriguing with interesting transitions between the forms as well as having excellent craftsmanship. I would like the viewer to come close and interact with the piece. Most of my pieces have smooth planes, crisp, clean corners, and have an architectural quality to them. I like having historically significant or object-based themes tied into my sculptures. My work covers a diverse range formally. Every piece explores something different. Some may have abstracted imagery: I will stretch, compress, or twist an image. In others, I explore scale, form, and shape.

Artist Statement:

Dance #nowaste is more abstract- exploring sustainability as three dancer forms celebrate sustainability and no waste.

It began as an 8 foot tall sheet metal plate. All elements- the positive, negative and line are used. There is literally no waste.

Artist Statement:

In the night sky between the Southern Cross and Hydra glows Centaurus. This is my rendering of it. Connecting the dots, so to speak.
