

Urbandale PCC Patch Phase 1

Notice of Road Construction

This notice is to let residents know about upcoming road construction in your area. This work is to repair sections of roads with new PCC Patches as well as restoration of disturbed area. The Contractor, Caliber Concrete LLC, will backfill, seed, and water disturbed areas. In the fall, sod will be placed where the seeding did not establish. Residents will not need to do restoration themselves, although additional watering to help establish good growth is always appreciated.

We will contact individuals prior to any work at a driveway. Please let us know about any upcoming activities that will affect this work (Garage sales, graduation parties, moving, etc.). If you have irrigation lines or sprinkler heads by the back of curb, we ask that you mark them and let us know. Contact information for both the Contractor and City is below.

Patches will require lane closures, and streets will remain open. Please keep cars parked on the street away from patch work to allow drivers to get past the work zone. As always, please use caution when driving through work zones.

Construction updates will be available at <https://www.urbandale.org> under "City Projects".

Work will begin in the area of Tanglewood Drive, 161st, 162nd Street and 159th Street, and will occur for approximately three weeks starting April 20th (weather dependent).

The entire project is expected to be completed by September 25th, 2020.

Kristin Brostrom, City of Urbandale, 515-331-6735 kbrostrom@urbandale.org

Jason Gettler – Caliber Concrete LLC 515-661-8635 jasongettler@caliber-concrete.com

Thank you for your patience during this construction.
