

Approximate Date Street Patches will be happening is _____

Homeowners can you please flag your irrigation ,lawn mower wires and invisible fencing so we can do our best to take care of them, thank you in advance.

“The Concrete Contracting Company” has been contracted by the City of Urbandale to replace defective concrete street panels. Some of these areas also include sidewalks ramps and/or driveway approaches. The work in your area will last for approximately two weeks weather permitting. If you have a driveway approach that is affected you will be contacted so you can arrange for vehicle parking.

Sodding and seeding typically will not be done during the summer months (June 1st – August 31st) due to the hot and dry conditions. The contractor will be seeding disturbed areas as the work is being completed and will be back in the Fall to sod the areas where the seed hasn’t taken shape. Additional watering of sod and seed by the property owner is appreciated and will help establish a good root system.

Every effort will be made to minimize any inconvenience to you. Your cooperation with construction crews and patience with any brief traffic or access delays will be appreciated.
