Subject: 104th Street Pavement Improvements Project
City Project 2018-005

Dear Urbandale Business:

The City of Urbandale has a project to reconstruct 104th Street from Hickman Road to Douglas Avenue beginning this spring. This project will replace the rural roadway with a three lane urban cross-section, including storm sewer, sidewalks, and associated grading. Intersections will be reconstructed as necessary.

The City of Urbandale has awarded the contract for the 104th Street Reconstruction Project to Concrete Technologies, Inc. (CTI). We recently held a pre-construction meeting with CTI. They are intending to begin clearing and tree removal this week as weather permits. Utility relocation plans are currently underway. As weather permits, CTI will begin storm sewer construction.

This project will require closures of 104th Street. The project will be staged so as to minimize the length and times of roadway closures. We have a webpage for this project. Please visit www.urbandale.org and click the “City Projects” link to stay up to date on 104th Street Reconstruction and other project timelines.

Please feel free to contact me at 515-278-3950 or kbrostrom@urbandale.org if you have any questions. Thank you for your cooperation on this project, and we look forward to working with you as we improve the 104th Street Corridor.

Sincerely,

A handwritten signature in blue ink that reads 'Kristin Brostrom'.

Kristin Brostrom, P.E.
Senior Engineer
